

we inspire stunning outdoor spaces through the benefits of shade.

Since 1991, USA SHADE has been the pioneer, innovator and proven industry leader in fabric shade structure design and technology. As a vertically integrated business, we offer our clients an extensive line of shade solutions for multiple applications across many industries and consistently outperform our competitors.

find the solution to your next project

activate spaces and improve the outdoor experience

Safeguards against sun and weather damage

Increase airflow and comfort

Blocks up to 96% of harmful UV rays

Low maintenance

10-year warranty

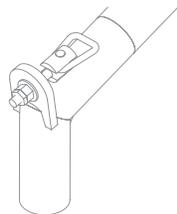

25-degree temperature reduction keeps seating and play surfaces cool

optional quick release

This icon indicates shade structures available with our quick release option (QRE), which allows you to quickly remove and reattach fabrics for winter storage or in extreme weather conditions.

range of sizes available

Our shade structures have a range of sizing options available to suit your needs. To choose the right size for your space, discuss your upcoming project with a representative.

hip

The workhorse of our product line, the Hip structure is a simple design and cost-effective solution for shading a wide variety of spaces.

hip

slant hip

two post hip

hip

10'x12' to 40'x40'

multi-panel

18'x20' to 40'x40'

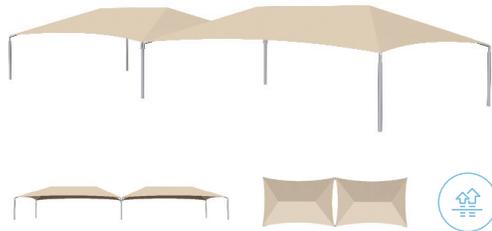

double-wide

Combine Single Top or Multi-Panel into a variety of sizes.

joined

Combine Hip or Multi-Panel into a variety of sizes

extended

10'x24' to 38'x60' (Extended frames that are a single top hip up to 30' wide and 60' long.)

two post

10'x16' to 14'x22'

slant

10'x12' to 40'x40'

mariner

The Mariner structure provides shade similar to our Hip or Pyramid designs but features multi-panel shade layers that create a striking presence.

20'x20' up to 40'x40'

wave

Designed to mimic the look of a wave, our Wave structure features a peak-and-valley shape, adding excitement and movement to any application.

20'x20' up to 30'x30'

mariners joined

super span

Our massive Super Span structures provide maximum shade for larger outdoor areas including basketball courts, mass automotive coverage, and outdoor seating spaces.

4 column

40'x50' up to 60'x60'

6 column

56'x90' up to 56'x90'

multi-level

30'x40' up to 60'x60'

pyramid

single post pyramid

pyramid

Our Pyramid structures feature a square, peak-roofline design and can be joined together to cover a larger footprint.

single post

10'x10' to 20'x20'

pyramid

10'x10' to 35'x35'

joined

Available in a variety of combined sizes from single top or multi-panel.

pyramid multi-panel

multi-panel

18'x18' to 35'x35'

hexagon

For areas that require zero obstruction from a center column, the Hexagon is ideal, with six columns around the perimeter.

hexagon

20' to 50'

hexagon multi-panel

30' to 50'

octagon

Our Octagon structure is an ideal solution for shading areas up to 80' in diameter without the obstruction of a center column.

35' to 80'

triangle

triangle

For asymmetrical, elongated areas where square or rectangular structures are impractical, our Triangle structures provide plenty of shade with a peak-roof design.

18' to 30'

umbrella

coolbrella

umbrella

The Umbrella is a single-column structure with eight fabric attachment points and a pointed top.

10' to 20'

mariner hexagon

The Mariner Hexagon is available in diameters up to 40' and incorporates upper and lower fabric layers, giving the structure a unique appearance.

30' to 45'

coolbrella

The Coolbrella is a commercial-grade, permanent umbrella canopy featuring one support column with one frame-tensioned fabric roof section. Available in a variety of colors with fabric tops that can be removed easily without wheels, wires or pulleys.

12' or 20'

3-point sails

Our 3-Point Sail structure features a high-end design with a unique triangular shape, giving outdoor spaces a sophisticated look.

20'x20'x20' to 30'x30'x30' (up to 40' per side)

4-point sails

Our 4-Point Sail structure features columns of varying heights, allowing the fabric to be formed into a hyperbolic shape.

Up to 50' per side

3-point sail

single post pyramid cantilever

single post pyramid cantilever

Our Single Post Pyramid Cantilever structure is ideal for spaces like walkways and poolside lounges that need shade without column obstructions.

10'x10' to 20'x20'

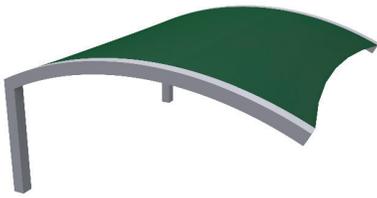

panorama

Our Panorama cantilever design is an elegantly arched roof that is suited to provide shade over areas that require unobstructed spaces like walkways, bus stops, or automotive parking.

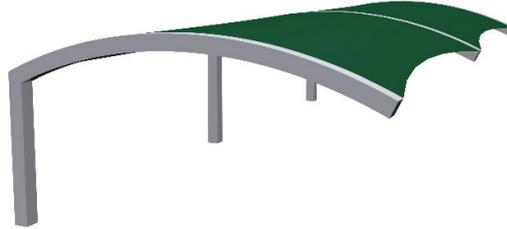

single

23'x27'

joined

Combine singles into a variety of lengths

kyrene

The Kyrene is a cantilever structure with a curved arch that can provide shade over long stretches of space without obstructing walkways or paths underneath.

single

12'x20'

joined

Combine singles into a variety of lengths

panorama joined

full cantilever hip

These structures can be utilized for a variety of applications needing unobstructed space on one side such as seating areas, benches, and parking lots.

single

10'x10' to 20'x40'

joined

Combine singles into a variety of lengths

double-wide

Combine singles into a variety of lengths and widths

slanted cantilever wing joined

NEW!

slanted cantilever wing

Much like the Full Cantilever Hip design, the Slanted Cantilever has two columns and a tilted-down top to increase shade coverage for spaces exposed to harsh sunlight at an angle.

single

10'x24' to 20'x30'

joined

Combine singles into a variety of lengths

double-wide

20'x24' to 40'x40'

slanted cantilever wing double-wide joined

inspiration

At USA SHADE, our capabilities go above and beyond our standard offering to provide world-class shade solutions for any type of project. Through collaboration with our customers, our design experts, and our seasoned engineers, we bring custom project ideas to life.

finishes/powder coat colors

Following a thorough cleaning, we apply your choice of finishes to our steel structures:

- ① **Polyester-TGIC powder coating** provides maximum adhesion, UV protection and fade resistance. Available in a wide range of colors, this coating has higher surface hardness/scratch resistance than common liquid paints.
- ② **Zinc-rich primer** provides added corrosion protection around areas such as pools, reclaimed water irrigation and salt water.
- ③ **Hot-dip galvanizing** provides the best protection in the industry. The steel is dipped in zinc, then powder-coated or wet-painted to resist corrosion in areas with salt water or high humidity.

fabrics

USA SHADE uses the best materials available including HDPE, a high-density polyethylene mesh, which can block out up to 96% of the sun's harmful UV-A and UV-B rays. We offer a variety of materials with varying degrees of UV and weather protection, fire retardance, and non-combustibility. All of our fabrics are easy to maintain, providing protective shade and vibrant color over a long period of time
